2527	OSMOFORM TOP DRESS	2/3 MTHS	19+2.2+11+1.2+TE	20KG BAG
2524	OSMOFORM 38N	2/3 MTHS	38+0+0	22.7KG BAG

Osmoform is a small homogenous granule of slow release Nitrogen (SRN) plus P, K and all trace elements. The Scotts patented SRN is unique in that the Nitrogen is predominantly released to the plant slowly by microbial activity – not dissolved by water ensuring a more reliable release.

Osmoform is available in two specific formulations. *Premix* is designed to be incorporated into an unfertilised potting mix for up to 12 weeks as well as 'charging' the mix with all other plant nutrients. **Osmoform Topdress** is formulated with a faster releasing SRN (8 weeks) for quick green-up of tired plants and will adhere to the soil surface.
