

... The Scotts Difference.

Osmocote®

Every Osmocote prill consists of a water soluble nutrient granule, coated with a thin sem-permeable resin. Water vapour penetrates the granule and dissolves the nutrients. The coating controls the release according to changes in soil temperature. More nutrients are released in warmer months when the plant is growing and less in cooler, inactive months.

3757	OSMOCOTE	6 MTHS	AZALEAS, CAMELLIAS & RHODODENDRONS	700 GM TUB
3756	OSMOCOTE	6 MTHS	GARDEN BEDS	700 GM TUB
