

Fertilisers - Slow Release

NITROFORM UF 38

0060 22.7 KG BAG U.F. 38 38-0-0 FINE GRANULES BLUE

Gro-Max
EASIGREEN
 SLOW-RELEASE NITROGEN
 3-4 MONTHS PER APPLICATION
 GUARANTEED ANALYSIS
 NITROGEN (N)
 AS ISOBUTYLIDENE-DIUREA 31%

EASIGREEN IS AN IDEAL FERTILIZER TO BROADCAST ON MULCHING MATERIALS, e.g. PINEBARK, STRAW, WOOD SHAVINGS, ETC. IN ORDER TO COUNTERACT NITROGEN LOSS WHICH OCCURS DURING THE NATURAL BREAKDOWN OF THESE MATERIALS. USE 15g (1 MATCHBOX FULL) PER SQUARE METRE.

Seasol[®]

THE SEAWEED SOLUTION

Seasol seaweed extract provides a 100% organic, scientifically proven treatment for all plants, at all stages of growth, from seedling to maturity and beyond.

Seasol is derived from a uniquely Australian Bull Kelp, which is collected from remote beaches - it is not harvested from living marine forests. Seasol contains natural plant growth stimulants, trace elements and amino acids, which together provide dynamic effects on the growth and overall health of the plants. Independent trials have demonstrated that Seasol has effects above and beyond a "fertiliser".

Regular applications of Seasol will result in:

- Increased root development.
- Increased growth and vigour.
- Extended flowering.
- Enhanced fruiting.
- Increased resistance to insect and fungal attack.
- Better recovery from stress (e.g., drought, poor nutrition).

Seasol is easy to apply & can be purchased in concentrated form or in ready-to-use spray packs.
