

ANCHOR BANDS

NATURAL RUBBER PLANT TIES

ANCHOR BANDS are made from biodegradable "NATURAL RUBBER LATEX".

Natural rubber is elastic & allows plants to grow undamaged while maintaining a firm grip.

Beware of synthetic rubber ties that lack *ELASTICITY* that is, the ability to expand & contract.

Damage to plants by such ties is inevitable as they do not *BIODEGRADE* & are in fact permanent.

ANCHOR BANDS are an essential component of responsible plant management that minimises plant damage.

ANCHOR BANDS are economical, quick to apply & UV stable for up to 12 months.

"THE BEST NATURAL RUBBER PLANT TIE IN THE WORLD"

**SUITABLE FOR MOST TREES & SHRUBS SUPPORTED BY
WOODEN OR BAMBOO STAKES**
